Congratulations! You have successfully completed the AWS Certified SysOps Administrator - Associate and you are now AWS Certified.

The AWS Certified SysOps Administrator - Associate (SOA-C02) has a scaled score between 100 and 1,000. The scaled score needed to pass the exam is 720.

As a reminder, you are bound by the [Candidate Code of Conduct](#) you accepted when taking your exam, and you are expected to keep the contents of the examination secure. If you have any questions or require assistance, please [contact us](#).

Congratulations again on your achievement and the ability to claim the associated benefits, such as digital badges and discount vouchers for future exams. To take advantage of the benefits associated with your AWS Certified SysOps Administrator - Associate certification, explore the "Benefits" section of your [AWS Certification Account](#).

Thank you,

AWS Training and Certification

AWS Certified SysOps Administrator - Associate

Breakdown of Exam Results

The information in the table below details the composition of the AWS Certified SysOps Administrator - Associate and your performance in each of the exam sections. The table includes the classifications of your performance at each **section level**.

This information is designed to provide feedback about your examination performance. The examination is scored using a compensatory scoring model, which means you do not need to “pass” the individual sections. Each section has a specific weighting on the examination, so some sections have more questions than others. This information is general and highlights your strengths and weaknesses.

Meets Competencies: Performance at this level demonstrates knowledge, skills, and abilities expected of a passing candidate.

Needs Improvement: Performance at this level does not demonstrate knowledge, skills, and abilities expected of a passing candidate.

Not Enough Information: On your exam, this domain included a mix of exam lab items, multiple choice items, and multiple response items. The exam lab items are reported as a separate domain score, and there were not enough items remaining in this domain to gauge competency.

Note: As of March 28, 2023, the AWS Certified SysOps Administrator - Associate exam will not include exam labs until further notice. This removal of exam labs is temporary while we evaluate the exam labs and make improvements to provide an optimal candidate experience.

Exam Lab Domain: This reports your performance on the exam labs section. Note that this section may span several domains.

Score Performance				
Section	% of Scored Items	Not Enough Information	Needs Improvement	Meets Competencies
Domain 1: Monitoring, Logging, and Remediation	20%			
Domain 2: Reliability and Business Continuity	16%			
Domain 3: Deployment, Provisioning, and Automation	18%			
Domain 4: Security and Compliance	16%			
Domain 5: Networking and Content Delivery	18%			
Domain 6: Cost and Performance Optimization	12%			

Disclaimer: AWS Certification exams are designed to make pass/fail decisions based on the total exam score. Section level results are designed to provide direction on areas where a candidate may be weak. Candidates should exercise caution when interpreting the above section level score information as it is less reliable than the total exam score and not intended to guide future test performance.
